13mm Turbo Stealth

•To make folding easier, crease all the dashed lines with a ballpoint pen and a straight edge
•Cut out the holes for the launch rod (LR) and motor mount with a sharp craft knife.
•Cut out the Motor Mount, cut only on the solid lines and fold on the dashed lines toward the printed side.
•Form the Motor Mount into a 3 sided tube and glue together.
•Cut out the main body.
•Fold the 3 sides of the Top away from the printed side, form them into a box shape and glue using the tab.
•Fold the triangles of the Bottom toward the printed side.
•One at a time, spread glue evenly over the back (non-printed side) of the three triangles and fold them under the Top.
•Make sure all the edges line up before the glue sets.
•Fold the tabs at the top end of the Motor Mount slightly inward and spread glue on the them.
•Slide the glued end of the Motor Mount into Bottom until it makes contact with the inside of the Top.
•Put a fillet of glue around the joint between the Motor Mount and the Bottom.
• Use Estes mini motors only.
